Policy Motion (high-level action request):			
<p>The FSC membership asks FSC to fast-track the implementation motion 18 from GA 2011 to create a chamber balanced process to consider challenges and opportunities related to restoration and conversion. This will include: a) how to address the “ownership loophole” in #6.10: b) What does an organization that has converted post 1994 need to do to be able to be certified: c) How to deal with subsistence conversion by communities. We also ask FSC to allow for a possible amendment of the P&C outside the defined 5 year revision schedule and request an electronic ballot by the membership to allow for charges in the P&C to be approved before the next GA.</p>
